Taiwan Outstanding Photonics Product Award 2013

### **Chunghwa Picture Tubes, LTD.** Touch Embedded Portrait / Landscape 3D Display

#### **Product Introduction**

This product, CPT Touch Embedded Portrait/Landscape 3D Display, can support not only display 3D content in portrait and landscape but also provides suitable multi-touch gestures for 2D and 3D mode separately. And the 3D module of the product already included a capacitive multi-touch sensor for multi-touch gesture, so it doesn't need an additional touch module. For this reason, the display module can be made thinner. Besides, 3D format data can be converted to 3D contents automatically and displaying contents can be recognized to switch 2D or 3D display mode automatically. There is no doubt that it will bring the users an amazing user experience in operation and vision respect.

#### **Product Features**

**Technology** The 3D module with 3D Portrait/Landscape LC-Barrier technology included a capacitive multi-touch sensor so it doesn't need an additional touch module and the display module of the product can be made thinner, easier and low cost.

**Innovation** CPT Touch Embedded Portrait/Landscape 3D Display can display 3D content in portrait and landscape.

**Market** At present more and more smartphone products with 3D module are presented, and the operating systems of smartphone are getting more and more perfect. For these reasons, CPT will go with this stream to extend 3D portable device market demand and enlarge 3D portable device market share.

**Design** The main design for this product is to bring the users friendly and intuitive interface. For this reason, the portrait/landscape switch is controlled by G-sensor, and the product can switch 2D/3D automatically and executes suitable gesture, such as pinch gesture, etc., in 2D and 3D mode according to the content is displayed.

**Other** It can recognize file format and then execute 2D to 3D conversion automatically. All switches, such as advantages 2D/3D switch, portrait/landscape switch, etc., are automatic. These designs and features make the users feel easy to use and more comfortable after they have watched display for a long time.
